

E. Print- Out Coding

The screenshot shows a code editor window titled 'modul 2 atika lapkhir.py'. The code is a Python script that prints user information and calculates the factors of a number. The code is as follows:

```
1 C:\Users\user> python modul 2 atika lapkhir.py > ...
2 print("Nama : atika stiowati")
3 print("Nim : 1306625102")
4 print('\n')
5
6 while True:
7     hasil= [25]
8     n= int(input('masukkan bilangan <100 (selesai)=0 '))
9     if n ==0:
10         break
11     for i in range (1, n+1):
12         if n % i == 0:
13             hasil.append(i)
14     print(' Bilangan faktor dari', n, 'adalah', hasil)
15     print('selesai')
16
```

F. Print Screen Hasil Keluaran

The screenshot shows a terminal window with the following output:

```
PS C:\Users\user\AppData\Local\Programs\Microsoft VS Code> & C:\Users\user\.local\bin\python3.14.exe "c:/Users/user/modul 2 atika lapkhir.py"
Program Faktor Bilangan
Nama : atika stiowati
Nim : 1306625102

masukkan bilangan <100 (selesai)=0 25
Bilangan faktor dari 25 adalah [25, 1, 5, 25]
selesai
masukkan bilangan <100 (selesai)=0
```
